CSS BASICS

EXTERNAL STYLE SHEET
There are two methods you can use to attach an external style sheet; link and import. Please use the "link" version for this class.
☐ External CSS attached using link

AN ADDITIONAL DIVISION
To keep the styles in the header from interfering with the styles from the content, you need to add an extra division tag between the navigation and footer tags.
☐ Add a content <div> tag as an ID

SELECTORS
Write style rules that affect the built in html elements. (body, p, h1, h2, etc)
☐ Include at least three style rules for HTML elements.

COMMENTS
Include CSS comments (different than HTML) in your style sheet
☐ Include at least three CSS comments in your style sheet.

MULTIPLE SELECTORS
Demonstrate that you know how to combine selectors.
☐ One rule that groups multiple selectors (ex: h1, p { color: #00ff66;})

STYLING A LISTS
Write style rules that alter the bullets displayed on your lists.
☐ Use at least two different bullet types in your lists.
☐ Use padding and margin to style the lists
☐ Style the definition list

PSEUDO-CLASSES
Write a pseudo class that affects the links on the content of your page.
☐ a:hover {}

CLASS SELECTORS
You add these in the document. For example, you will see class="presenter" in the body and .presenter in the CSS. Navigation does not count here.
☐ Include at least two CLASS's in the body of your document
☐ Include at least two CSS rule that links to a CLASS selector.

BORDERS
Please demonstrate you can use borders in your work by implementing the following.
☐ Border (color, type, thickness)

NAVIGATION
Turn the ul used for page navigation into a horizontal list.
☐ Float menu items
☐ Remove default underlining
☐ Make menu items look nice with padding
☐ Use a background color in the <nav> and prevent it from collapsing

CSS BASICS

ACTIVE STATE

Demonstrate that you know how apply an active state to your navigation items to show improve "way finding" on your site.

☐ Add a class="active" to each of your menu items
☐ Style the class with an "active" color that looks nice

FONT STUFF

Type is important as it sets the mood of your page. Instead of using with the default fonts on the end users system, lets try a Google font.

☐ Import a Google font
☐ CSS font-family property
☐ CSS font-size property used
☐ At least 3 other CSS properties used (line-height, font-weight, font-style, text-align, etc.)

COLORS

Please also include these additional things in the CSS of your document.

☐ Background color used
☐ Font color used

COLOR METHODS

Please also include these additional things in the CSS of your document.

☐ Color Name used
☐ HEX color used
☐ RGB color used

VALID CSS CODE

Please check your code for ALL three pages prior to sending it to see if you missed anything. You should use the html code validator located at http://validator.w3.org

☐ CSS code checked at http://validator.w3.org

FTP UPLOAD

Use an FTP client of your choice to successfully login and upload your Summer Assignment.

SUBMIT TO D2L

Copy your url to your site to a Word or text document. Submit that document to the Vacation Website dropbox on D2L.
